7. 1968-69-ம் ஆண்டிற்கான முதலாவது துணை நிதிநிலை அறிக்கை மீது பொது விவாதம்

* THIRU M. WILLIAM : Mr. Deputy Speaker, Sir, with regard to the Demands for Grants for Further Expenditure, I wish to offer a few remarks. Firstly, I will deal with the Education Demand. Nearly a crore of rupees is asked for for expenditure under this Head. Of course, very many schools have been opened and very many schools have been upgraded. Though much progress has been made in the matter of education, the pupils and the public still suffer due to several hardships experienced in the matter of school buildings in which the students are to study Recently, due to the heavy rains in the Kanyakumari district a number of primary schools have fallen down. Similarly a few middle schools and also one or two high schools have fallen down. As a result of that the pupils and the teaching staff were exposed to rain and sun and for a few days the imparting of education was stopped in the schools. The Deputy Inspectors and the District Education Officers were rather indifferent and they did not go to the affected places. They did not make sufficient enquiry and they did not take any steps to replace the fallen buildings and so much so, some of the buildings which have fallen down remain in the same state and no structures—either temporary or permanent—have been put up in those places. So, the people there are facing a lot of difficulties due to rain and also sun. Representations have been made to the District Educational authorities and they did not care to take any steps in that direction and therefore I would request the Hon. Minister to spend some time on this matter and issue necessary instructions so that the schools which have fallen down are replaced and semi-permanent or permanent structures are erected there.

Now, I want to refer to one of the high schools in Karungal, about which representations have been made both when the Congress Party was in power and when this Government came to power. It is a very big school and its strength is about 2,000 and still there is no semi-permanent or permanent building for that high school. In the recent examinations, that school stood first in the district and in spite of that the request of the public has not been heeded and they are exposed to rain and heat. In this connection, I want to point out that a certain amount has been allotted for this purpose but the construction of the main building has not yet begun. So also in regard to another high school in Kollengode, people are experiencing the same hardships. In order to have effective control over the District Education Officers and the Deputy Inspectors, I think the post of a Chief Education Officer
